Reference Method for Broth Dilution Antifungal Susceptibility Testing of Yeasts; Third Informational Supplement

This document provides updated tables for the CLSI antimicrobial susceptibility testing standard M27-A3.

An informational supplement for global application developed through the Clinical and Laboratory Standards Institute consensus process.
Reference Method for Broth Dilution Antifungal Susceptibility Testing of Yeasts; Third Informational Supplement

Abstract

The tabular information in this document presents the most current information for drug selection, interpretation, and quality control.

The data in the interpretive tables in this supplement are valid only if the methodology is followed in CLSI document M27-A3—Reference Method for Broth Dilution Antifungal Susceptibility Testing of Yeasts; Approved Standard—Third Edition.
